

# Gillian Student Lab 2024 - Feedback

The Gillian Debugger is an active project and we are greatly interested in your feedback as users to improve it! As you complete the lab, could you please fill in the below table with any issues or ideas for improvement you come across? This shouldn't add much work; just add 5 or so of the most important issues you came across, in sufficient detail for us to understand them. This would be of huge help, thank you!

## Issues

There are **9** classes of issues we are interested in:

- **I1:** I don't know how to read the specifications.
- **I2:** The tool is not working fast enough.
- **I3:** I don't understand the feedback the tool is giving me (e.g. error messages).
- **I4:** I don't know how to act on an error message.
- **I5:** I wish I better understood how Gillian works.
- **I6:** I wish there was a faster or different way of doing this with Gillian.
- **I7:** I don't understand what the tool expects me to do next.
- **I8:** I don't understand the lab sheet.
- **I9:** Something else.

## Severity

Please also tell us the severity associated with each issue:

- **S0** Critical: this needs to be resolved for me to consider using this tool in my own work
- **S1** Major: this problem should be solved as soon as possible
- **S2** Minor: it would be helpful to fix this problem, though it doesn't need to be fixed soon
- **S3** Nice-to-have: this isn't really a problem, but it would be nice if it was changed
- **S4** Not a problem: (you don't have to report these 😊 )

Issue Class	Severity	Description of the issue	How could we fix this?

(I'm double-sided)
